1. Introduction

This guide is for the Proprietor and authorised members of school management. It explains how to run Imagemakers Nursery and Primary School through the Admin area, which the system calls the **Command Centre**.

The system has four main portals: Admin, Staff (teachers), Student (pupils) and Parent. Each person sees only the portal that matches their account.

About the pictures in this guide. The sign-in screens are real screenshots of the live system. Pages behind sign-in are explained with diagrams and plain steps, because the documentation team could not sign in to the school's live records from the test computer, and no real pupil or parent information may appear in a guide.

What the school does not use

- There is no boarding or hostel module in use. The school has no boarding facility.
- Transport screens exist in the system, but the school no longer runs its own buses. Do not treat the bus pages as an active service.
- Online card payment (Paystack) is **not live**. Fees are recorded manually by the bursar until the school's merchant account is registered and tested.

2. Signing in

Go to the school's system address. The home address opens the sign-in page directly.

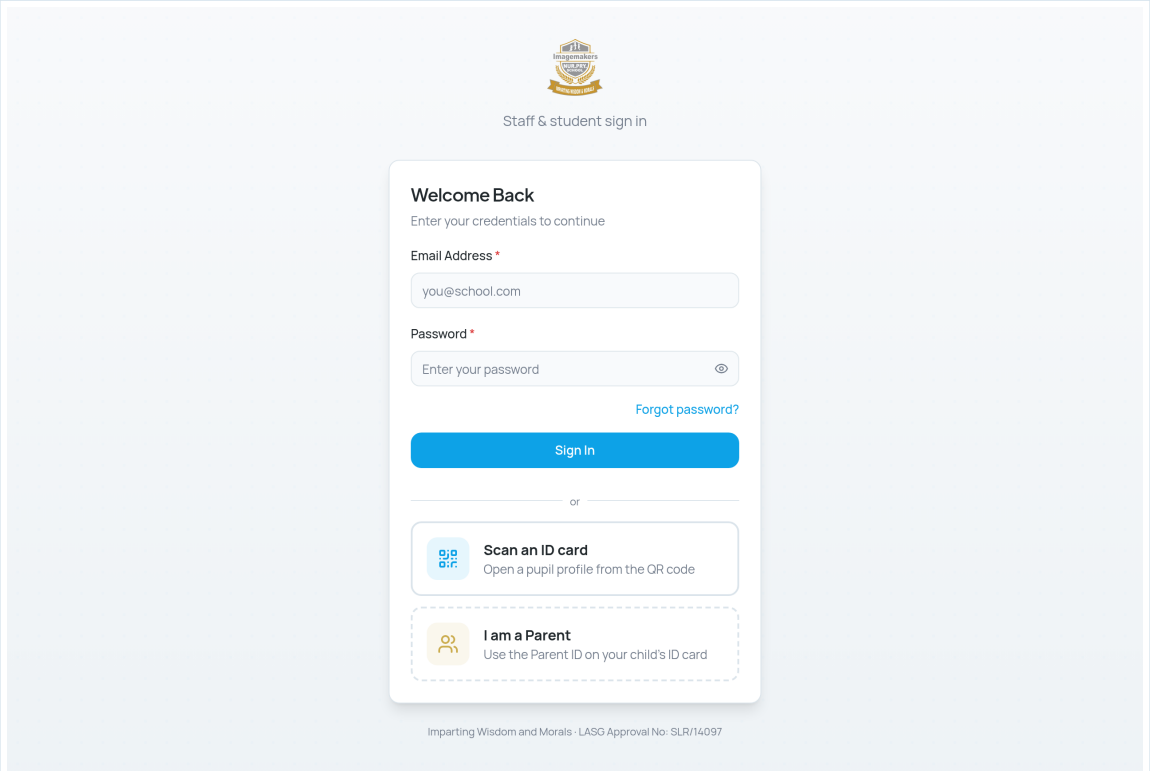

Figure 2.1 — The sign-in page (real screenshot).

1 Type your school email address and password.

2	Tap **Sign In**.
3	The system checks your role and opens the Admin Command Centre for administrator accounts.
4	If you forget your password, tap **Forgot password?** and follow the email link.

Viewing the other portals as an administrator

In the sidebar, the **Open portals** section lets an administrator open the Staff, Student and Parent portals with the same account, so you do not need a second device.

- **Staff portal:** if your admin account is not itself a teacher, the system lets you view the portal as the class teacher of the largest class.
- **Student portal:** you see one pupil from that class. A notice reads “Admin preview identity” so nobody mistakes it for your own record.
- **Parent portal:** if your account has no linked child, it shows that same pupil, as a parent would see them.

> Preview viewing is for checking and training only. Do not enter marks or attendance while previewing as another teacher — any record you save is still saved under your own admin account.

3. The Admin layout

On a computer, the navy sidebar on the left lists every admin page in sections. On a phone, tap the menu button at the top to open the same list. The sidebar remembers where you scrolled, so it does not jump back to the top when you open a page.

Area	What you find there
Dashboard	School-wide counts and shortcuts
People	Students, Staff, Manage Users, Bulk Upload / Register Import, ID Cards
Academics	Approvals, Reports, Progression (promotion history), CBT Studio, Oversight
Finance	Finance (invoices, receipts, debtors, discounts, audit trail), Fees catalogue, Financial Intelligence
Communication	Announcements, Communication templates, Policies, Documents, Complaints
Welfare & operations	Wellbeing, Behaviour, Predictive analytics, Library, Inventory, Visitors, Substitutions
Settings	School settings, activity log

4. School roles

Role	Portal	What they do
Proprietor / Super Admin	Admin	Everything, including adding other administrators
Other administrators	Admin	Sections set by their admin permission template
Class teacher	Staff	Their own class: attendance, marks, lesson notes, assignments, CBT
Pupil	Student	Own dashboard, results once published, homework, CBT
Parent / guardian	Parent	Linked children only: results, attendance, fees, receipts

Principal and Bursar separation is not yet fully enforced. Admin permission templates can hide menu sections, and fee changes are protected by a “manage fees” permission. However, any administrator can still read academic records, and money records are not hidden from every non-finance administrator at database level. Until this is completed, only give admin accounts to people trusted with both results and money.

5. Managing pupils

Open **Students** in the sidebar.

1	Use the search box or class filter to find a pupil.
2	Tap **Add student** for a new pupil, or the edit button on a row to correct a record.
3	Fill in the name, class and admission number. Parent/guardian details are optional and can be added later.
4	Tap **Save**. The list refreshes and the pupil appears under their class.

- Admission numbers can be changed at any time. Imported pupils carry temporary numbers that begin with **PENDING-2026-** until the official register is entered.
- Changing an admission number does not break the pupil's ID-card QR login, because the login is tied to the pupil record, not the number.
- To confirm a save worked, refresh the page and search for the pupil again.

Bulk upload and register import

Use **Bulk Upload** or **Register Import** to bring in many pupils from a spreadsheet. Download the template on that page, fill it in, and upload it. Check the preview before confirming.

Before importing, compare names against the existing list. Do not import the same register twice. If a duplicate is created, correct or deactivate one record by editing it; do not delete records that already have marks or invoices.

6. Parents and child links

A parent sees a child only when a link exists between the parent account and that pupil. Parents sign in on the **I am a Parent** screen using the Parent ID and access code printed on the back of the pupil's ID card.

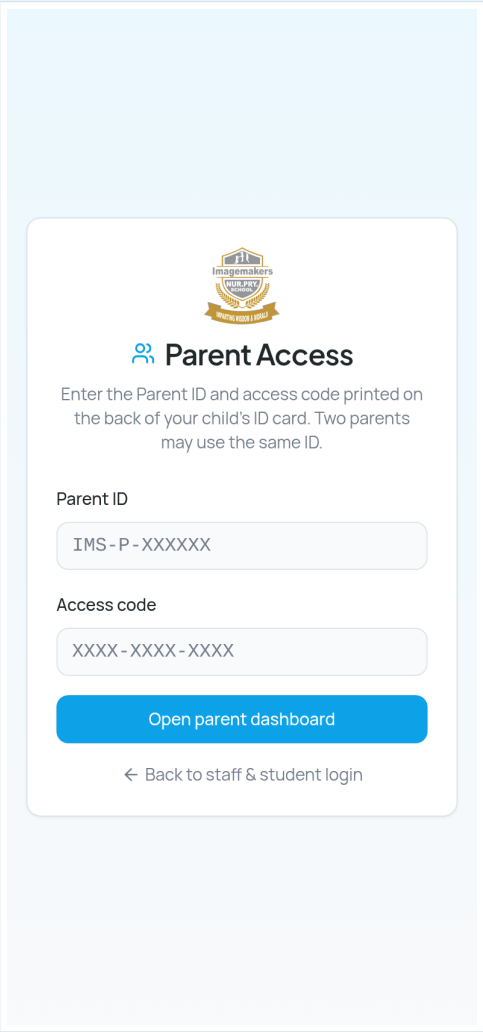

Figure 6.1 — Parent Access screen (real screenshot).

- Access codes now use a longer format (XXXX-XXXX-XXXX) and are created when ID cards are printed in **ID Cards**.
- Two parents may use the same Parent ID.
- If a parent says no child appears, check that the pupil has an ID card printed and that the parent used the codes from that card.

7. Staff, classes and subjects

Open **Staff** to add or edit teachers and other staff. Open **Manage Users** to manage login accounts.

The class-teacher model

Imagemakers uses one class teacher per class. Each class has a class teacher set on the class record. When that teacher signs in, they see only the pupils in their class, and they can enter marks for every subject of that class.

Figure 7.1 — How a class teacher's work is organised.

Specialist subjects

French, Diction, Coding, Abacus, Creative Art and Yoruba are specialist subjects. A specialist teacher is linked to a class only where a class-subject link has been set. These subjects use letter grades A–E.

> The school has not yet supplied the score boundaries for the A–E specialist grades, or whether they count towards the promotion average. The system does not yet have a separate A–E entry screen. Do not rely on specialist grades on the report card until this is finished.

8. Sessions, terms and results

The 2026/2027 session has three terms: **Wisdom**, **Excellent** and **Glorious**. Only one term is marked as current at a time; set it in **Settings**.

How a score is calculated

Teachers enter Continuous Assessment (shown as CA 40) and Examination (shown as Exam 60). The system adds them to give a total out of 100 and fills in the remark automatically.

Total score (CA + exam)	Remark shown
90 – 100	Outstanding
70 – 89	Excellent
60 – 69	Very Good
50 – 59	Good
40 – 49	Fair
0 – 39	Poor

> The database still also stores an older A–F letter alongside each score. The school has approved descriptive remarks, not that A–F scheme, so treat the remark as the official result. Removing the A–F letter is on the developer's list.

Approving and publishing

1	Teachers submit marks for approval from the Gradebook.
2	Open **Approvals** to review submitted marks.
3	Report cards are prepared from the Report Card page and become visible to pupils and parents only when published.
4	Check publication by viewing the pupil in the Student portal preview.

> Unpublished results do not appear for pupils or parents. If a parent reports a missing result, first check whether it has been published.

9. Promotion, repetition and demotion

Open **Progression**. Choose the pupil, the decision (promoted, repeated or demoted), the new class, the session and the date, then save.

- The system changes the pupil's class and writes the history record in one step, so the two cannot disagree.
- A repeated pupil must stay in the same class; a promoted pupil must move to a different class. The system refuses other combinations.
- Only administrators can record a decision.
- A 50% average is the qualification threshold. The system does **not** promote anyone automatically — the school records each final decision.

> Pupils can read their own progression history. Parents cannot yet read it, and no message is sent to the pupil or parent when the class changes. Inform families directly for now.

Historical report cards

Results are stored per term and session, so earlier terms remain in the system after a pupil is promoted. A pupil-facing selector for older sessions has not been fully checked; confirm with the developer before telling parents they can browse past years themselves.

10. Fees and the fee catalogue

Open **Fees** to manage the fee catalogue. Each fee item has a name, amount, category, whether it is **mandatory** or **optional**, and optionally a class and term.

Item (school reference prices)	Amount	Billing
Monday/Tuesday uniform pair	₦26,500	Optional, per pupil and term
Wednesday wear	₦10,000	Optional
Friday wear	₦10,000	Optional
Taekwondo	₦18,000	Club — billing rule to be confirmed
Red Cross	₦12,000	Club — billing rule to be confirmed
Cub Scout	₦18,000	Club — billing rule to be confirmed
Brownie	₦12,000	Club — billing rule to be confirmed

- Mandatory items are added to every invoice for the class and term they apply to.
- Optional items (uniforms, clubs) are added only for pupils for whom the item has been selected.
- Textbooks and 40/60/80-leaf notebooks must be bought through the school office. Their titles and prices have not yet been supplied, so they are not in the catalogue. Add them as fee items once the school provides the list.
- Do not record the same book both as an invoice line and as a separate office sale — that would charge the parent twice.
- There is no fixed due date, because the school accepts instalments.

11. Invoices, payments and receipts

Figure 11.1 — The current manual fee flow.

Generating invoices

1	Open **Finance** → **Invoices**.
2	Choose the term (and a class, or all classes).
3	Tap **Generate**. One invoice is created per active pupil who has a class.

Running generation again for the same term does **not** create a second invoice. It refreshes the fee lines on the existing invoice from the current catalogue. Discounts and payments are kept.

Recording a payment

1	Find the invoice and tap **Record payment**.
2	Enter the amount, method (cash, transfer, POS) and reference.
3	Save. A numbered receipt is created and the balance updates.
4	Print the receipt; it carries the school crest.

Part payments are allowed. The payment is applied to invoice lines in priority order, and the invoice shows the remaining balance.

Discounts, debtors and audit

- **Discounts**: apply a fixed or percentage discount with a reason.
- **Debtors**: lists invoices with an outstanding balance for the chosen term.
- **Audit trail**: every financial change is logged and cannot be edited or deleted.

12. Staff attendance and oversight

Open **Oversight**. It has four tabs: Teacher clock-ins, Timetable, Lesson notes and CBT exams.

- Teachers clock in from the Staff portal on their phone. A clock-in after **7:30 a.m.** is marked late. No grace period is configured.
- The phone's location is checked against a 400-metre radius around the school. This radius has **not yet been approved** by management.
- Timetables can be viewed here. A screen for teachers to build their own timetable does not exist yet, so the timetable may be empty.
- Lesson notes submitted by teachers can be viewed. A formal approve/return step is not built yet.
- A live “class has started” signal is not built yet.

13. CBT, announcements and the Wall

CBT exams

Open **CBT Studio** to create exams and questions inside the Admin area. A pupil can see an exam only when it is set to active. Answer keys are not sent to pupils; the score is worked out on the server when the pupil submits.

> The offline Windows CBT application has been planned and specified but has not been built. Do not promise it to staff yet.

Announcements

Open **Announcements**, write the title and message, choose the audience (everyone, staff, students or parents) and publish. Only published announcements are shown.

Community Wall

Staff, pupils and parents can post and comment on the Wall. Administrators should check it regularly. The browser does not yet ask for notification permission, so people only see new posts when they open the system.

14. Documents, analytics and AI tools

- **Documents** collects report cards, invoices, receipts and exports in one place.
- **Analytics** and **Reports** read live school records. Because grades, attendance and timetables are still empty for this session, many charts will show zero until teachers begin entering data.
- **Predictive analytics** and **Wellbeing** depend on marks, attendance and behaviour records. Treat their suggestions as prompts for a conversation, never as a decision about a child.
- The **AI helper** works only for signed-in users. It is set to guide pupils rather than do their homework. It does not yet read uploaded pictures.

15. Common problems

Problem	What to do
A parent sees no child	Check that the ID card has been printed and the parent used that card's Parent ID and code
A pupil sees no results	Check that results for that term have been published
A teacher sees no pupils	Check that the teacher is set as class teacher on the class record
An invoice looks wrong	Correct the fee item, then run Generate again for that term — payments and discounts are kept
The wrong class after promotion	Record a new progression decision; the history keeps both entries
Page shows “Something went wrong”	Tap Try again; if it repeats, note the page and time and tell the developer

16. Safe administration

- Never share passwords or parent access codes on WhatsApp groups.
- Give admin access only to people who need it, and remove it when they leave.
- Do not delete pupils who have marks, invoices or receipts — change their status instead.
- Print ID cards only from the ID Cards page so codes are generated properly.
- Report any suspicious login or unexpected change to the Proprietor immediately.

17. Frequently asked questions

Can parents pay online?

Not yet. Online payment needs the school's own Paystack account registered with its CAC documents, then testing. Until then the bursar records payments manually.

Will the system promote pupils automatically at 50%?

No. 50% is the qualification threshold. The school records every decision.

Can we change an admission number later?

Yes, at any time, from the Students page.

Is there a hostel or bus module?

Not in use. The school has no boarding, and transport is outsourced.

Can a Bursar be blocked from seeing results?

Not fully yet. See section 4.
